

Md Javed Alam

Vadodara, Gujarat — javedalam1731@gmail.com — +91 7654865117 — [LinkedIn](#) — [GitHub](#)

Professional Summary

Computer Science undergraduate with strong problem-solving skills and hands-on experience in full-stack web development using the MERN stack (MongoDB, Express.js, React.js, Node.js). Proficient in Java, Python, JavaScript, SQL, and REST APIs, with experience building scalable and responsive web applications. Passionate about software development, backend engineering, and creating efficient, user-focused solutions.

Technical Skills

Languages: Java, Python, C++, JavaScript, SQL

Frontend: React.js, HTML, CSS, Redux Toolkit

Backend: Node.js, Express.js, REST APIs, Authentication & Authorization

Databases: MongoDB, MySQL

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Problem Solving

Tools: Git, GitHub, AWS (Basics), VS Code, Postman

Projects

GenAI-Powered Interview Preparation Platform — MERN Stack, Firebase — [GitHub](#)

- Built an AI-powered interview preparation platform where users can upload resumes and get AI-generated interview questions.
- Implemented Technical and HR interview practice with intelligent feedback and secure Firebase authentication.
- Integrated Razorpay payment gateway with a credit-based access system and deployed the MERN application on Render.

AI Virtual Assistant — MERN Stack, Gemini AI, JWT — [GitHub](#)

- Developed a JARVIS-style AI virtual assistant using the MERN stack with voice input/output powered by the Web Speech API.
- Integrated Gemini AI for intelligent conversational responses and implemented secure JWT authentication with bcryptjs.
- Added assistant customization features, including image uploads with Cloudinary.

Resort Booking Web App — MERN Stack — [GitHub](#)

- Developed a full-stack booking application with secure authentication and role-based access control.
- Built RESTful APIs using Node.js and Express.js and integrated them with the frontend.
- Designed scalable MongoDB schemas and optimized backend logic.

Media Search Web App — React.js, Redux Toolkit, REST APIs — [GitHub](#)

- Built a React-based media search platform integrating Unsplash, Pexels, and Tenor APIs for real-time search.
- Implemented Redux Toolkit for efficient state management and optimized API handling.
- Developed reusable UI components and responsive frontend design.

Education

B.Tech in Computer Science — Parul University

CGPA: 7.83 2023 – 2027

Achievements

- Solved 500+ Data Structures and Algorithms problems, strengthening analytical and logical thinking.
- Contributed to Braidpool (Web3 real-world project) by improving frontend components and resolving UI issues.

Certifications

- Spring Boot for REST API Development — Parul University (*July 2025*)
- UX Masterclass with Figma — Parul University (*March 2025*)
